

## CHEMICAL-RESISTANT Coating

Ceramic particle loading significantly enhances the dynamic chemical performance of the CeRam-Kote 2000 system. Total performance characteristics of CeRam-Kote 2000, both chemical and mechanical, are significantly better than liquid epoxy, fusion-bond epoxy and other high performance coating systems.

CeRam-Kote 2000 protects by binding ceramic particles to a unique resin system, thus creating an **encapsulating ceramic shell**. Each ceramic particle is resin coated and becomes tightly packed in the cured film.

### Suggested Uses:

- Internals in Tanks
- Hydrocarbon Service
- Harsh Chemical Environments
- Blow Out Preventers
- Petrochemical Environments
- Secondary Containment
- Clarifiers
- Non-UV Areas
- Wastewater Treatment Pumps
- Internals in Valves
- Wastewater Treatment Lift Stations
- Fuel Tanks
- Internals in Vessels and Piping
- Brine Tanks

CeRam-Kote 2000 is a **tough barrier coating** for internal immersion service that is highly cross-linked to provide superior chemical resistance. The coating may be force-cured with heat for enhanced performance in extremely harsh environment.

CeRam-Kote 2000's **direct-to-substrate** one-coat, two-pass system translates to increased production efficiency and significantly reduced down-time, essential in industry today. CeRam-Kote 2000 is available in white and grey. The CeRam-Kote 2000 formula has an ABS Certificate of Design Assessment #05-HS487406-PDA.

## INTERNAL IMMERSION SOLUTION

### PHYSICAL PROPERTIES

<b>Adhesion</b> (ASTM D4541, elcometer pull-off)	>16.54 Mpa (2,400 PSI)
<b>Abrasion Resistance</b> (ASTM D 4060, Tabor Test 1,000 cycles, CS 17 wheel, 1kg)	37.3 milligrams loss
<b>Flexibility</b> (ASTM D 522, Conical Mandrel Bend at 24°C)	11% elongation
<b>Impact Strength</b> (ASTM G 14)	1.47 joules
<b>Dielectric Strength</b> (ASTM D 149)	2,500 volts/mil
<b>Static Coefficient of Friction</b> (ASTM D 4518-90)	0.187 mean static friction value
<b>Salt Spray</b> (ASTM B117 at 1000 hours )	Pass
<b>Water Vapor Transmission</b> (ASTM E96)	0.157 grains per sq.ft per hour
<b>VOC (Volatile Organic Compounds)</b>	89 g/litre (calculated value)
