

**FLUMES, SLIDES, AND POOLS**  
in waterparks present unique  
maintenance problems!

Many paint products used on slides and flumes such as polyurethanes are not intended for and do not perform well in constant immersion.

CeRam-Kote CERAMIC EPOXY coatings have been in immersion service in oil fields and marine environments for over fifteen (15) years with outstanding performance. They have remarkable adhesion to gelcoat, fiberglass, aluminum, steel and concrete.

CeRam-Kote 99M offers:

- Ease of Application – Brush, Roll or Spray
- Wide Range of Colors
- Easy Field Repair
- High Abrasion Resistance
- Flexibility
- Use in High Humidity – Will Not Blush, Waterspot, or Lose Gloss During Application
- Extremely Good Color and Gloss Retention – Even in the Florida Sun!
- Very High Solids
- Quick Turnaround (within three days)
- Resurfacing/Repair Material Can Refurbish and Restore Pools that need it.

CeRam-Kote 99M was tested on a flume at Rapids Water Park, West Palm Beach, Florida. The result:

*“THUMBS UP!! Three more have been refinished with CeRam-Kote. Better than anything yet.”*  
- Bob Nichols
